

# QUICK COUPLINGS

# STÄUBLI

Advanced connection solutions

# STRACK®

# NORMALIEN

## Quick coupling for all fluids and gases

### **RBE Modular quick coupling** for all fluids and gases

- Flexible modular system
- Proven reliability
- Fast and automatic
- Optimal flow capacity
- Absolute safety
- Tightness guarantee

ND (mm): Ø 3, 6, 8, 11, 19

## Manifold

### **NCI 33 Manifold**

*Temperature control*

- High benefit due to intelligent distribution function
- Integrated seal
- Rotatable modules
- Marking of the cycles
- Simplified use of the control systems

## Accessories

### **Connection accessories**

- Optimal connection for almost any application due to comprehensive program
- Materials for many different applications (brass, partly nickel-plated, corrosion-resistant steel, AISI 316 L stainless steel)
- Safety due to O-ring sealing system KES

## Multi-couplings

### RMI Multi-coupling

*Temperature control*

- Centralized connection of your temperature control circuits for a faster work process
- Efficient and fast
- Safe
- Flexible use

ND (mm): Ø 6, 9, 12, 16

### MCI 209 Multi-coupling

*Temperature control*

*Free of leakage*

- Centralized connection
- Clean-break technology
- Optimal work- and process security
- Efficient and fast

ND (mm): Ø 9

### RMP 49 Multi-coupling

*High-pressure hydraulic*

- Centralized connection
- Efficient and fast
- Safe
- Coupling elements with even front surfaces
- Flexible use
- High performance data

### SPC Multi-coupling

*Sequential injection*

- Centralized connection for safety and performance
- Optimal safety
- Flexible use
- Compact design
- Robust design

ND = Nominal diameter

## Mono-couplings

### **RPL Full flow quick-release coupling** *Temperature control*

- Simplified marking of the circuits
- Safe and fast locking
- Immediately sealed
- Free circulation of the media

ND (mm): Ø 6, 7,5, 12

### **CBI Clean break quick couplings** *Temperature control*

- High work- and process security
- Reliable and robust
- Automatic locking
- Efficient
- Reliable sealing

ND (mm): Ø 3, 6, 9, 12, 16

### **RMI Quick coupling** *Temperature control*

- Safe and fast locking
- Reliable and robust
- From Ø 20: splash-free, marking of the circuits, locking sleeve with circlip
- RMI 37: automatic locking

ND (mm): Ø 6, 9, 12, 16, 20, 25, 37

### **MPX Coupling** *Hydraulic*

- Automatic coupling process
- Free of leakage and bubbles due to even front surfaces
- Security against unintended unlocking
- Optimal flow capacity
- Temperature resistant and for all hydraulic fluids

ND (mm): Ø 6, 10, 12, 16, 19, 25

ND = Nominal diameter

## Mono-couplings

### **CBX Clean break quick coupling** *Hydraulic*

- High work- and process security
- Reliable and robust
- Automatic locking
- Efficient
- Reliable sealing

ND (mm): Ø 3, 6, 9, 12

### **SBA Coupling** *Hydraulic*

- Clean-Break generation
- Low flow resistance
- Clear circuit marking
- Locking safe and robust
- Protected sealing elements
- Protecting caps
- Coupling under residual pressure

ND (mm): Ø 8, 11, 12, 15

## Quick coupling systems

### **Standard solutions**

You are searching for reliable and high-performance connecting solutions for your production processes?

Our product range offers a variety of standardized solutions and certainly offers the right product for your application.

### **Tailor-made programs**

For all applications which cannot be realized with standard solutions our experts are supporting you competently and professionally.

### **Complete systems**

Production processes with different media?  
We offer high-tech solutions with exemplary productivity and safety.

*Have we inspired your curiosity?  
Please consult us!*

## Know-How spread over a wide spectrum

Due to a unique competence in the coupling technology, STÄUBLI can optimally meet customer requirements in terms of efficiency and sustainability and can offer an even faster and more effective customer service in cooperation with STRACK.
