# STRACK®
NORMALIEN

SIMPLIFICATION OF DESIGN

Our range of CAD data in the standard parts libraries

YOUR ADVANTAGES:

✓ Immediate use of the standard parts

✓ Time-saving and flexible design

✓ Quick execution of activities in the areas of tool assembly and standard parts installation

✓ Modification or exchange of the standard parts possible without further additional effort

✓ Direct forwarding of data to the production for machining and processing

✓ Automatic creation of part lists

✓ Improved quality by standardisation of designs

✓ Native CAD program

✓ Direct integration of the STRACK standard parts library into the respective system possible
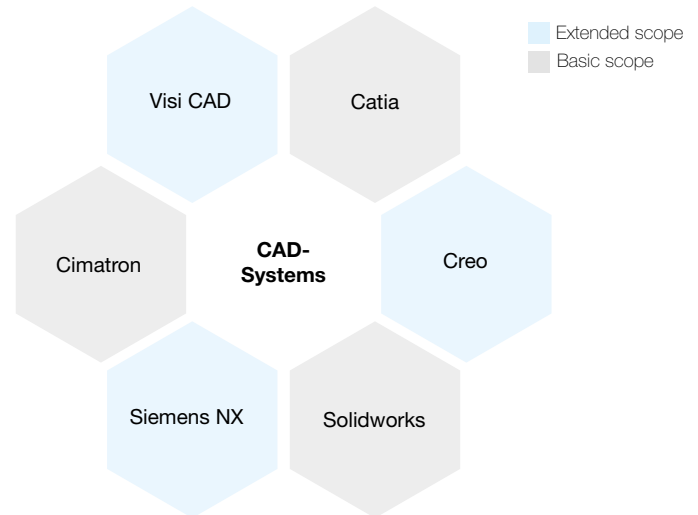

You will find further advantages
on our homepage!

DIRECT INTEGRATION OF OUR CAD DATA INTO THE MOST COMMON CAD SYSTEMS

- The standard parts can be flexibly adapted to the flexibly adapted to the required size

- Integrated into the CAD system, offline work is also possible in addition to the online solutions.

NEW: All demolding elements were imported into VISI and Siemens NX as well.

Extended scope
Basic scope
